DETAILED ACTION

Allowable Subject Matter

1. **Claims 5-8 (1-4)**, are allowed.

The following is an examiner's statement of reasons for allowance:

Regarding **claim 5**, the present application teaches a system for wirelessly connecting a computer device to a server base. The computer device generates location data, retrieves a server phone number from memory based on the generated location data. If no server phone number corresponds to the generated location data, the computer device wirelessly send a request to a default number, a phone number look up number associated by the default number, retrieves a server phone number from a local memory, based on the received request, and sends the retrieved server phone number to the computer device. The computer device wirelessly connects to a server based on the sent server phone number data.

The closes art to the present application such as Hanson (US Patent 5,963,861) teaches a system a system for wirelessly connecting a computer device to a server. The computer device generates location data, send it to a server, and the server retrieves a phone number from memory based on the generated location data as mentioned in the above rejection. Hanson fails to teach a system wherein, if no server phone number

corresponds to the generated location data was found, the computer device wirelessly send a request to a default number, a phone number look up number associated by the default number, retrieves a server phone number from a local memory, based on the received request, and sends the retrieved server phone number to the computer device.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
